

June 21, 2010 RESERVOIR LEVEL AND SNOW UPDATE

Flow in the Rio Grande, from upstream at Otowi bridge and down through Albuquerque and Bosque to San Marcial, has been declining following the runoff peak that occurred towards the end of May. Flow at San Marcial is significantly lower than the median. Storage in Elephant Butte/Caballo has also continued its decline as average release for the week ending June 16 exceeded average inflow by more than 1200 cfs.

COMBINED STORAGE Elephant Butte and Caballo June 18, 2010 629,922 acre-feet
